PROFESSIONAL SUMMARY

Data Analyst with 3+ years of analytics experience building end-to-end solutions across SQL, Python, Power BI, and Azure — from cloud ETL pipelines and star-schema warehouses to ML-driven dashboards. Delivered a fraud-detection model (AUC 0.957, 90% recall) on 558K healthcare claims and a live mutual-fund analytics platform covering 14K+ schemes. Microsoft PL-300, AZ-900, DP-900 and AWS Cloud Practitioner certified, with BFSI domain experience.

TECHNICAL SKILLS

Languages & Querying: SQL (window functions, CTEs, query optimization), Python (pandas, NumPy, scikit-learn)

BI & Visualization: Power BI (PL-300), DAX (40+ measures), data modeling, star schema, Streamlit, Excel (Advanced)

Cloud & ETL: Azure Data Factory, Blob Storage, Azure PostgreSQL, ETL pipeline design, AWS (fundamentals)

Databases: PostgreSQL, MySQL, Supabase; dimensional modeling, indexing, CTE-based deduplication

ML & Tools: Logistic Regression, XGBoost, K-Means, Prophet forecasting, Git, n8n automation

PROJECTS

Healthcare Provider Fraud Detection | Python · scikit-learn · Azure ADF · PostgreSQL · Power BI | [GitHub](#)

- Engineered end-to-end fraud detection pipeline on 558K real Medicare claims — Azure Blob → ADF → PostgreSQL (9 tables, 2.43M rows) → Power BI.
- Built Logistic Regression model (AUC 0.9573) achieving 90.1% fraud recall, outperforming XGBoost (65.4%) and Random Forest (61.2%); engineered 28 ML features in PostgreSQL including diagnosis-stuffing rate and claims-velocity signals.
- Exposed \$295.68M in potential fraud (53.1% of total reimbursed) via a 226× fraud-concentration finding; delivered 4-page Power BI dashboard with drill-through provider investigation and dynamic risk verdicts.

Mutual Fund Analytics Platform | Python · Azure · Power BI · Streamlit · PostgreSQL | [GitHub](#)

- Architected Python ETL pipeline ingesting live NAV data for 14,384 fund schemes across 51 AMCs from AMFI and Yahoo Finance APIs into a star schema (5 dim + 4 fact tables, ~100K observations) on PostgreSQL, orchestrated end to end.
- Computed CAGR, Sharpe, Sortino, Beta, Jensen's Alpha and max drawdown for 16 benchmark funds, validated against published index returns; built 4-page Power BI dashboard with 25+ DAX measures on Azure (Blob → ADF → SQL).
- Deployed live 5-page Streamlit app with Prophet NAV forecasting, SIP calculator and portfolio analyzer, served from a cloud PostgreSQL backend.

Olist E-Commerce Analytics Dashboard | SQL · PostgreSQL · Azure ADF · Power BI · DAX | [GitHub](#)

- Built Azure cloud ETL pipeline (Blob Storage → Data Factory → PostgreSQL) over 8 raw tables and ~112K order items; designed a cleaned star-schema warehouse (4 dim + 1 fact) with CTE deduplication and performance indexing.
- Developed 3-page Power BI dashboard with 40+ DAX measures and AI visuals (Decomposition Tree, Key Influencers, what-if price simulation) across sales, geographic and delivery-operations views.
- Uncovered ~97% one-time-buyer retention gap (on customer_unique_id grain) and 38% single-state revenue concentration alongside 91.9% on-time delivery, translating findings into loyalty and logistics recommendations.

CERTIFICATIONS

- Microsoft PL-300 (Power BI Data Analyst)
- Microsoft AZ-900
- Microsoft DP-900
- AWS Cloud Practitioner
- CFA Institute Investment Foundations

EXPERIENCE

Freelance Data Analyst — Finonus Capital | Aug 2024 – Present

- Deliver financial data analysis across insurance, mutual funds and bonds; produced an NSE-universe research report covering 2,272 stocks (26-sheet Excel model, 23-industry analysis) and client portfolio review reports.
- Design and build Power BI dashboards for clients across multiple business domains (financial services, e-commerce, operations), covering KPI tracking, sales performance and management reporting.
- Built n8n automation workflows for lead management and CRM, reducing manual follow-up effort for the advisory pipeline.

Analyst — Bhartia Foundation, Churu | Jul 2022 – Jul 2024

- Built interactive Power BI dashboards tracking enrollment, attendance and academic KPIs for 500+ students, used by leadership for strategic decisions; produced monthly financial reports and budget-tracking dashboards.
- Analyzed admission-funnel data using SQL and Excel, identifying conversion bottlenecks that improved process efficiency; designed and maintained student data systems across enrollment, academics and fee collection.

Digital Marketing Executive — Shriram General Insurance, Sikar | Dec 2021 – May 2022

Subject Matter Expert (Finance) — Chegg Inc. | Feb 2021 – Jul 2021

EDUCATION

Bachelor of Commerce (B.Com), Accounting and Finance — University of Calcutta, Kolkata | 2017 – 2020
